## FOREWARD

During the more than 100 years that the National Agricultural Library has been in existence, it has acquired a notable collection of historical, agricultural, scientific, and economic books published during the 16th, 17th, 18th, and 19th centuries. In 1967, Mortimer L. Naftalin, as part of the Library's continuing efforts to inform the users of its holdings, compiled a bibliography of agricultural imprints published in Europe prior to 1800 and in the United States prior to 1830 (ie. Historic Books and Manuscripts Concerning General Agriculture in the Collection in the National Agricultural Library, Washington, D.C.: U.S. Department of Agriculture Library List No. 86, 94 pp.).

The Library, in recognition of the efforts of the American farmer in the Colonies as well as the farmers who succeeded them during the first half of the nineteenth century, has prepared this historical bibliography for use by scholars, students, and other interested individuals. The compiler would welcome comments and suggestions concerning any additional titles which might enhance the usefulness of this compilation.

JOSEPH F. CAPONIO  
Acting Director

## INTRODUCTION

Around the time of the American Revolution--1763 to 1800 about 90 percent of the American people were farmers. In their society, which was dependent upon land, labor, and crop production, there was the gentleman farmer able to experiment with the latest developments in agriculture as well as the small proprietor or yeomen who could not afford the luxury of experimentations involving the risk of failure, and therefore used the meager farm implements and practices which had been in use since Biblical times. The American Revolution, however, in addition to achieving independence for the Colonies, also set in motion economic, political, and social forces which led to gradual improvements in farming methods. In particular, improvements in the designs of plows, in the perfection of the mechanical reaper, and in transportation profoundly affected the life of the American farmer. New advances in agricultural technology and increased dissemination of knowledge through agricultural literature inclusive of monographs, published works of agricultural societies, and the growing number of periodicals finally culminated in what became known as the first Agricultural Revolution.

This bibliography is a selective compilation of monographs, periodicals and the works of agricultural societies published prior to 1860. The purpose of this bibliography is to provide a list of printed source materials which to varying degrees contain useful information concerning various aspects of pre-Civil War developments in agriculture

and its related fields within the United States. The works in this compilation are organized into three sections and arranged alphabetically. The references cited are, in most cases, those of the editions available to the author at the time of compilation.

The National Agricultural Library holdings are designated by using the appropriate call number symbol. Some of these items are part of a multi-volume work entitled Miscellaneous Reports of Agricultural Societies, v. 1-11, 1845-1875, a collection of transactions, journals, reports, proceedings, etc. of County and State Societies. Entries not in NAL's holdings but reported either in the National Union Catalog Pre-1956 or in the third edition of the Union List of Serials in the Libraries of the United States and Canada, are followed by an asterisk(\*). If the publication ceased prior to 1860, two slashes (//) are used. Titles that continued to be published after 1860 are indicated by a dash (-). Where a particular publication is either incomplete or there is uncertainty as to completeness, a question mark (?) is used. When an entry appears to be closed but there remains some uncertainty, a slash-question mark (//?) is used. A shortened version of these symbols appears at the beginning of each section of the bibliography.

Social Sciences

## AVAILABILITY OF CITED REFERENCES

Books. The National Agricultural Library (NAL) lends books, other than rare books, or those on reserve, or in the reference collection, to U.S. Department of Agriculture employees. Non-USDA individuals should arrange interlibrary loan through their local public, university or special library.

Periodicals. Periodicals and other non-circulating materials are not available for loan but may be used in NAL or in its designated reading rooms in the Washington, D.C. area. At no cost to the requestor, photocopy of journal articles will be sent in lieu of loan to USDA employees, 1890 land-grant institutes, and libraries with which NAL has reciprocal arrangement. Others may purchase copies from NAL's Photocopying Service, National Agricultural Library, Beltsville, Maryland 20705. Copying charges are:

Microfilms: \$1.00 for each 30 pages or fraction copies from a single article or book.

Electrostatic Copy: \$1.00 for each 10 pages or fraction copied from a single article or book.

Other details on the copying service may be obtained from the Lending Division of NAL.
